Less disorder is seen in the quarters of Col. Manuel Tamborel, opposite the European Business Juarez Theatre. A great path of blood covers the sidewalk immediately to the left of the entrance and the window is still soaked with the last blood of the little commander of the Juarez garrison. The official version of the Colonel's death is that about 10 o'clock Tuesday morning he made an inspection tour of the barri-cades and trenches to the west of town. He would not take a bodyguard because every man was needed at his post. He was wounded while walking about the trenches and started back to his head

Col. Angel Jimenez of the cavalry division saw the capture, charged the rebel squad and succeeded in retaking the commander after a sharp skirmish. Col. Tamborel them went to his quarters. The house was surrounded by Pancho Villa's men, determined to avenge the insults that the Colonel had hurled at the rebels when they were encamped in the hills. Col. Tamborel disregarded the warnings of his officers. He opened a shutter to the left of the entrance of his quarters and looked out to locate the firing that he might answer it. As soon as the shutter rattled a rain of lead fell against the walls and he fell across the window sill, his body full of lead.

Mrs. Tamborel was allowed to pass the insurrecto lines this morning and was met at the bridge by Mrs. Francisco I. Madero in an sutomobile and taken immediately to where the body of her husband was lying. With military ceremony befitting the funeral of a brave soldier Col. Tamborel was buried shortly after by the finaurrectos. A squad of trumpeters and drummers was recruited from among the Federal soldier prisoners in the jail. Their full military uniforms were given to them and they marched in front of the grocery wason which contained the unshrouded and uncofflined form of the Colonel. The rebel authorities say no accurate list can yet be obtained of their dead and wounded, as the first thing to be done is to attend to the wounded and bury the dead. The rebel loss possibly is twenty-five killed and a hundred wounded. There are forty-four wounded in the Porfirio Diaz Hospital on Juarez avenue. Ten additional wounded have been brought in. At the Federal hospital in Calle de la Paz there are seventy-three wounded. Among these, however, are a number who were wounded at the battle of Casas Grandes.

A number of dead have been removed from the hospital in Calle de la Paz. This hospital is more unsanitary than an American pigpen. It is nothing more than two rows of adobe rooms without ventilation and with but one opening. Here the men lie on the floor with flies swarming over their woundes. An effort is being made to have these men removed to a more sanitary place or brought to El Paso for treatment.

ASK RIGHT TO IMPORT ARMS

U. S. ALLOWS MEDICINE AND FOOD TO PASS INTO JUAREZ.

Precedents and Legal Opinions Seem to Pavor Petition of Mexican Insurgents Cabinet to Pass on the Question To-day -- Knox Seems to Reverse Knox WASHINGTON, May 11. Representatives

of the Mexican revolutionists took up with officials of the Treasury Department to-day the question of shipments to Juarez of arms and ammunition and food and medical supplies through the United States custom house at El Paso. Thomas G. Hopkins, a Washington

lawyer, represented the insurgents. He presented a telegram from Dr. Francisco Gomez, saying that food and medical supplies were being held up by the cus-toms officials at El Paso Mr Hopkine also asked that arms and ammunition be allowed to pass through.

Assistant Secretary of the Treasury Curtis consulted Secretary MacVeagh and the head of several thousand. With all later it was announced that food and medical supplies would be allowed to go through without interference, and that the question of clearing arms and ammunition would be decided definitely tomorrow. It is believed that a decision will be forthcoming only after the Cabinet has considered the question at its meeting

Most of the Treasury officials seem to be of the opinion that the United States will not be able to interfere in any way with the legitimate shipment of arms and ammunition through the El Paso custom house to Juarez. The question has apparently, however, been raised as to whether a shipment of arms and ammunition obviously for use by the insurrector DIAZ STAYS TO AVERT CHAOS in their revolt against the Mexican Government is not of itself a part of an "expedition" as prohibited by the neutrality laws.

The ground for this contention seems to be very slight, and the general impression is that the United States Government will not attempt to interfere with egitimate shipments of arms and ammu nition to Juarez so long as they are not secompanied by an expedition. The courts and former opinions by the De partment of Justice seem to leave little com for doubt on this question.

Secretary Knox himself was called upon when he was Attorney-General under President Roosevelt to decide whether inder existing laws it was possible to restrict the exportation of arms and warlike materials to China. At that time there were dangerous uprisings in the southern provinces of that country and it was charged that the insurgents were deriving supplies of arms and warlike material from abroad. In his opinion at that time. which seems to apply definitely in the case of Mexico, Attorney-General Knox

"The mere shipment or exportation of arms in the way of commerce to a country in which there are insurrectionary move-ments does not seem to be prohibited by our statutes or by the law of nations, and for this reason there appears to be nothing which this Department can do in the direction of restricting the exportation of arms and warlike materials to China."

Judson Harmon when he was Attorney General in 1895 reviewed the obligations mposed by international law upon this Government with respect to Spain in regard to the insurrection in Cuba. He
